Overview

Leveraging Program Data to Understand Equity

Federal Register / Vol. 86, No. 14 / Monday, January 25, 2021 / Presidential Documents

7009

Presidential Documents

Equity Executive Order

- EO 13985 (Equity EO) required DOL conduct an equity assessment, identify barriers to benefits and services, and recommend actions to improve equity.

Executive Order 13985 of January 20, 2021

Advancing Racial Equity and Support for Underserved Communities Through the Federal Government

By the authority vested in me as President by the Constitution and the laws of the United States of America, it is hereby ordered:

Section 1. Policy. Equal opportunity is the bedrock of American democracy, and our diversity is one of our country's greatest strengths. But for too many, the American Dream remains out of reach. Entrenched disparities

Leveraging Program Data to Understand Equity

- OPDR reviewed the completeness of demographic data in WIOA core programs.
- We next analyzed demographic differences in access to services and outcomes in WIOA core programs.
- These analyses became the **ETA State Equity Reports**.

Report Sections

Data Quality	Response rates for key variables: race, sex, ethnicity, training occupation codes, and employment after exit occupation codes
System Reach	Analysis of populations served by programs
Services	Demographic differences in the enrollment rates of different services relevant to each WIOA core program
Outcomes	Demographic differences in outcomes such as credential attainment, employment after exit, and earnings after exit
Relationships: Services & Outcomes	Demographic differences in outcomes when controlling for different services received

Data & Methods

The reports only use WIOA data from participants in Adult, Dislocated Worker, Youth, and Wagner-Peyser programs.

Race/ethnicity includes Asian, Black, White, and Other, Hispanic/Latino. Groups are also disaggregated by sex.

The reports use white male participants as a reference group for calculating differences.

Disclaimers

Disclaimer #1

Data in the ETA State Equity Reports may not exactly match WIOA performance reporting elsewhere.

- The equity reports only include data on participants with outcome data after program exit.
- Missing demographic data were imputed.
 - How much was imputed?
 - Sex: ~1%
 - Ethnicity: between 7% and 13%
 - Race: between 15% and 17%
(When Race was missing Ethnicity was still reported about half the time.)

Disclaimer #2

The ETA State Equity Reports are not an equity scorecard that grades states' performances.

- There are many external confounding factors that can impact and create disparity beyond a state's control.
- The reports allow us to identify potential challenges and successes. Follow-up exploration is always warranted.

Disclaimer #3

The reports are not prescriptive.

- The reports can be used to assess differences across demographics in core WIOA programs.
- It is up to the people interpreting the reports to decide what items (if any) stand out as potential successes, challenges, and/or opportunities for improvement.

Disclaimer #4

The reports cannot be used to compare states.

- There are many external factors that can create disparity beyond a state's control.
- States may be targeting different populations within the demographic group.

Disclaimer #5

Some states have small counts of demographic groups.

- No demographic group is omitted from the reports.
- Demographic counts can be found in the downloadable data tables near each chart within the reports.
- If a demographic group has a very low count, less confidence should be placed in findings for that group.

Disclaimer #6

PY21 was a pandemic year.

- The PY21 reports do not provide trends over time, but it may still be helpful to remember that the report results reflect pandemic conditions.
- It is possible that the pandemic created and/or exacerbated previously existing inequities. If something noteworthy is seen in the reports, consideration should be given to this.

Disclaimer #7

The reports' “equity” scope is not definitive.

- Not all underserved communities are currently represented in these reports. For example, the reports do not differentiate rural and urban populations.
- Where possible, future editions of the reports will evolve and broaden the scope to be more informative and inclusive.

How to use the reports

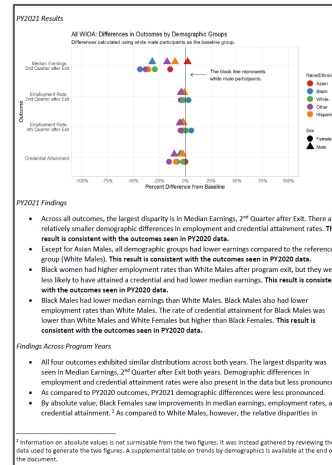

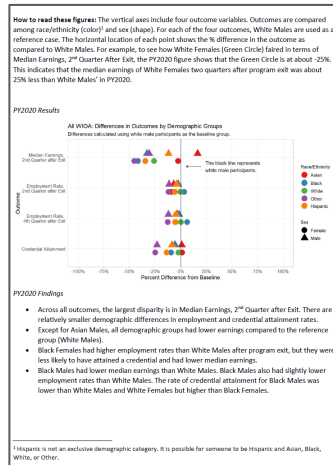

Use case #1

Answer questions pertaining to equity.

- Equity-related questions can be broad or specific.
- Questions might focus on specific programs:
 - *Are any groups underrepresented in WIOA Youth?*
 - *Does everyone experience the same degree of success after exiting WIOA Adult? If not, how do they differ?*
- Questions might focus on specific demographic groups:
 - *Are Black Women receiving equitable services?*

Use case #1

outcomes for Black Females demonstrate mixed results: the disparity in median earnings grew, the disparity in credential attainment shrank, and differences in employment rates stayed about the same.

Analytical Caveats:

- Figures and data compiled in this document include outcomes across all WIOA programs. More than 50% of the data are from Wagner-Peyser participants. Differences across demographics in outcomes may also exist at the program level that are not apparent at this aggregated level.
- Outcomes reported here do not account for confounding factors (e.g., barriers) that are correlated with demographics.
- Additional analysis would be required to determine if any interannual trends are significant and robust to confounding factors.

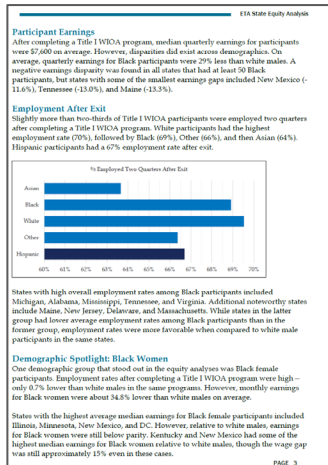

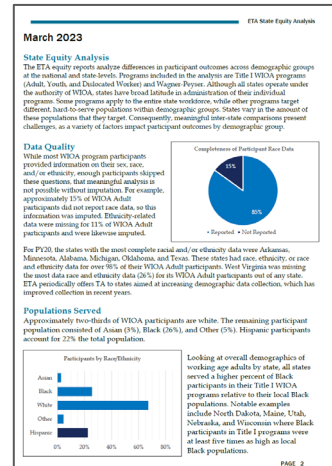

Further insights from the data		Median Earnings, 2 nd Quarter After Exit	Employment Rate, 2 nd Quarter After Exit	Credential Attainment, 2 nd Quarter After Exit
Race	Female	Median earnings increased by 25% compared to White Males. The disparity in earnings between Black Females and White Males is the largest among all groups.	Employment rate increased by 10% compared to White Males. The disparity in employment between Black Females and White Males is the largest among all groups.	Credential attainment rate increased by 5% compared to White Males. The disparity in credential attainment between Black Females and White Males is the largest among all groups.
	Male	Median earnings decreased by 25% compared to White Males. The disparity in earnings between Black Males and White Males is the largest among all groups.	Employment rate decreased by 10% compared to White Males. The disparity in employment between Black Males and White Males is the largest among all groups.	Credential attainment rate decreased by 5% compared to White Males. The disparity in credential attainment between Black Males and White Males is the largest among all groups.
Sex	Female	Median earnings increased by 25% compared to White Males. The disparity in earnings between Black Females and White Males is the largest among all groups.	Employment rate increased by 10% compared to White Males. The disparity in employment between Black Females and White Males is the largest among all groups.	Credential attainment rate increased by 5% compared to White Males. The disparity in credential attainment between Black Females and White Males is the largest among all groups.
	Male	Median earnings decreased by 25% compared to White Males. The disparity in earnings between Black Males and White Males is the largest among all groups.	Employment rate decreased by 10% compared to White Males. The disparity in employment between Black Males and White Males is the largest among all groups.	Credential attainment rate decreased by 5% compared to White Males. The disparity in credential attainment between Black Males and White Males is the largest among all groups.
Ethnicity	Female	Median earnings increased by 25% compared to White Males. The disparity in earnings between Black Females and White Males is the largest among all groups.	Employment rate increased by 10% compared to White Males. The disparity in employment between Black Females and White Males is the largest among all groups.	Credential attainment rate increased by 5% compared to White Males. The disparity in credential attainment between Black Females and White Males is the largest among all groups.
	Male	Median earnings decreased by 25% compared to White Males. The disparity in earnings between Black Males and White Males is the largest among all groups.	Employment rate decreased by 10% compared to White Males. The disparity in employment between Black Males and White Males is the largest among all groups.	Credential attainment rate decreased by 5% compared to White Males. The disparity in credential attainment between Black Males and White Males is the largest among all groups.
Other	Female	Median earnings increased by 25% compared to White Males. The disparity in earnings between Black Females and White Males is the largest among all groups.	Employment rate increased by 10% compared to White Males. The disparity in employment between Black Females and White Males is the largest among all groups.	Credential attainment rate increased by 5% compared to White Males. The disparity in credential attainment between Black Females and White Males is the largest among all groups.
	Male	Median earnings decreased by 25% compared to White Males. The disparity in earnings between Black Males and White Males is the largest among all groups.	Employment rate decreased by 10% compared to White Males. The disparity in employment between Black Males and White Males is the largest among all groups.	Credential attainment rate decreased by 5% compared to White Males. The disparity in credential attainment between Black Males and White Males is the largest among all groups.

Example 1

A report generated to answer questions from OASET.

Information from the reports were manually reviewed and significant findings were compiled here.

Use case #1

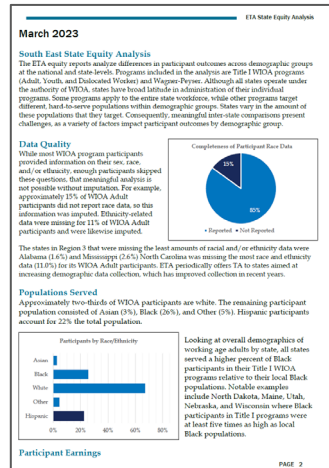

Example 2

A report generated to answer questions from the DecSec.

Information from individual state equity reports were reviewed manually and significant findings were compiled here.

Use case #1

Example 3

A report generated to answer questions from Region 3.

Information from R3 state equity reports were reviewed manually and significant findings were compiled here.

Use case #2

Identify successes

- The reports can be used to identify potential areas of success where a state is performing considerably well.
- This can merit follow-up exploration.
 - Is this something that the state was previously aware of?
 - What are they doing and how are they doing it?
 - Is this something that can be scaled or translated into best practices elsewhere?

Use case #3

Identify challenges

- The reports can be used to identify potential areas of improvement where a state may be able to perform better.
- This can merit follow-up exploration.
 - Is this something that the state was previously aware of?
 - Are there extenuating factors that explain the disparity?
 - Is this something that can be readily addressed?

Use case #4

Grant applications

- States will receive their respective reports on August 1.
- Findings may help states identify opportunities for improvement and lead to stronger grant applications.

Additional uses

The reports have depth and breadth. ETA offices or state agencies may uncover additional uses after the reports are disseminated.

Please let us know if there are additional use cases not captured here.

Who should review the reports?

The reports can spark conversation that effects change.

Relevant personnel from regional offices and state agencies should explore the reports.

Who should review the reports?

- Today is a preliminary meeting to give you an idea about the scope and utility of the reports.
 - Other people in your office will need access to them.
 - Additional support and TA will be needed.
- As we demo the reports, think about **who else in your office needs access** to these reports.
- Plan to reach out to us to **schedule a follow-up** meeting that includes all relevant staff in your office.

Rollout to State Agencies

State Agencies should receive their report on August 1.

Why August 1?

- Avoids scenario in which some states receive this critical information weeks/months later than others
- States need the reports as soon as possible to incorporate it into workforce strategies and the development of their WIOA State Plans

Rollout to State Agencies

Regional Offices will help with the rollout to state agencies.

Things to consider:

- Who on your team needs to facilitate the dissemination to state agencies? Make sure those team members are included in follow-up conversations with OPDR.
- What supplemental materials might your office need to help with the rollout to state agencies?

We will discuss logistics together at the follow-up meeting with your office.

[Overview](#) [Data Quality](#) [System Reach](#) [Services](#) [Outcomes](#) [Relationship: Services & Outcomes](#) [Methods](#)

Data Quality

This section examines the completeness of a select number of demographic and occupation code PIRL data elements (click to see more information on the [WIOA Participant Individual Record Layout](#)) from the data reported by WA and how it compares to the National level data. The completeness of this type of data is important for any analysis of programmatic equity. Missing data can bias the measurement of differences in outcomes or access to services between demographic groups.

The completeness of the data sex, race, and ethnicity PIRL data elements are shown by program below. In addition, the completeness of select PIRL data elements that collect occupation code information are also shown.

WIOA Adult [WIOA Youth](#) [WIOA Dislocated Worker](#) [Wagner-Peyser](#)

The following charts show the completeness of data for the **Adult** program.

[Completeness of Demographic Data](#) [Completeness of Occupation Data](#) [Data Table](#)

The following charts show the completeness of sex, race, and ethnicity PIRL data elements.

- Completeness of data for each WIOA core program.
- Includes info on demographics and occupation data (SOC codes)

System Reach

- Shows the participation level in each program by demographic group.
- Also shows the proportion of that group relative to the state's overall population.

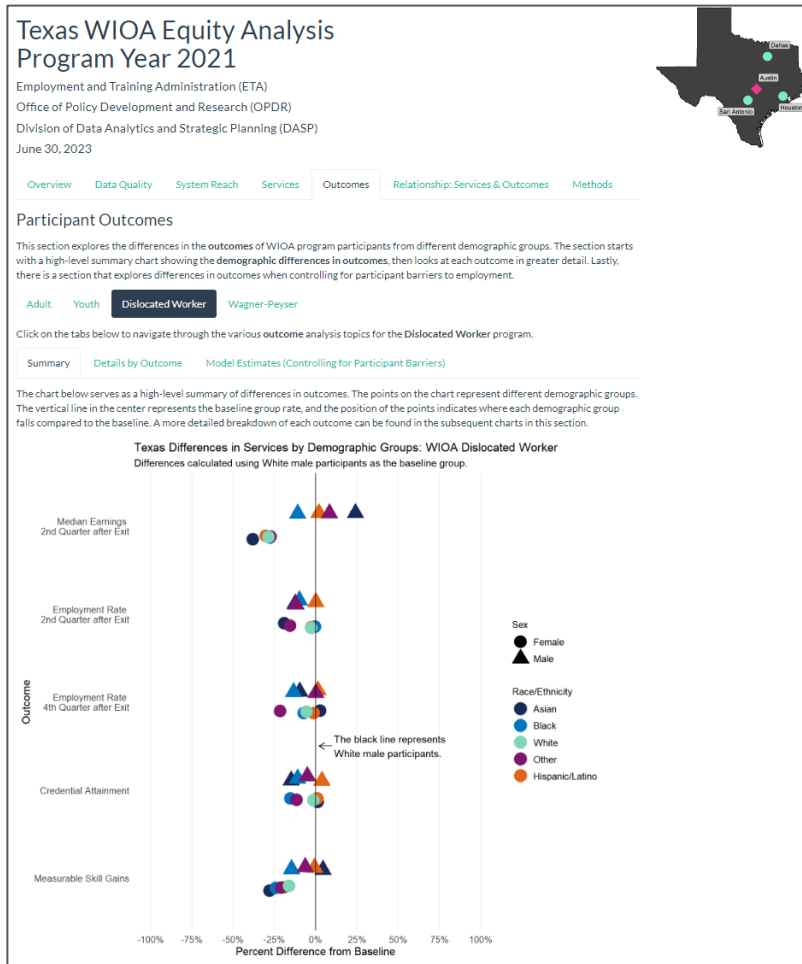

Services

- Shows the frequency that participants received services in each program.
- Information is presented using White Males as a baseline.
- “Model Estimates” graphs also show how robust these numbers are after accounting for confounding factors.
- Additional information is also available on training occupations across demographic groups.

Outcomes

- Explores median earnings, employment rates, credential attainment, and measurable skill gains after exit.
- Information is presented using White Males as a baseline.
- “Model Estimates” graphs also show how robust these numbers are after accounting for confounding factors.

Relationship: Services & Outcomes

Illinois WIOA Equity Analysis Program Year 2021

Employment and Training Administration (ETA)
Office of Policy Development and Research (OPDR)
Division of Data Analytics and Strategic Planning (DASP)
June 30, 2023

Overview Data Quality System Reach Services Outcomes Relationship: Services & Outcomes Methods

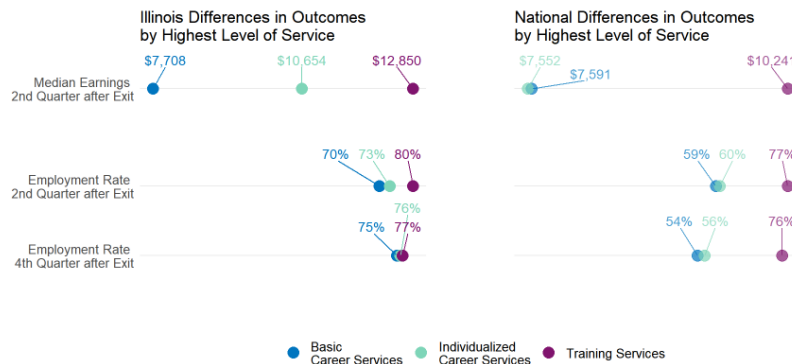

Relationship between Services and Outcomes for Participants

This section explores the intersection of services provided and outcomes for WIOA program participants of different demographic groups. The disparity in outcomes between groups is controlled for the types of services received by those groups. The section starts with high-level summary charts showing outcomes by each service type. Then, we look at the differences in demographic groups for each outcome and service type. Lastly, there is a section that explores differences in outcomes by service type when controlling for participant barriers to employment.

Adult Dislocated Worker Youth

Click on the tabs below to navigate through the various outcome analysis topics for the WIOA Dislocated Worker program.

Summary Details by Outcome Model Estimates (Controlling for Participant Barriers)

- Explores the relationship between the highest level of service received and both median earnings and employment rates after exit.
- “Model Estimates” graphs also show how robust these numbers are after accounting for confounding factors.

Next-Steps

Next-Steps

Schedule a follow-up meeting with us.

- Please decide who from your office should coordinate with us to schedule the follow-up meeting.
- Include all relevant staff in your planning.
- At our follow-up meeting, we can provide further TA, a more detailed walkthroughs on the reports, and provide more details on the dissemination to state agencies.
- Because of the upcoming August 1 release to state agencies, **scheduling with ROs is a top priority.**

Timeline

July 2023

- OPDR releases reports to regional offices and program offices.
- OPDR provides support on utilizing and navigating the reports.

August 2023

- OPDR will continue to provide support on utilizing and navigating the reports within ETA.
- Regional Offices will release reports to state agencies on Aug 1.

Spring 2024

- OPDR will refresh the reports with new PY data.
- New features will be incorporated into the next edition.
- ETA will transition to an annual release model for the State Equity Reports.

Q&A

Thank you!
